## THE EVOLUTION OF TRADITIONAL KNOWLEDGE

Vitastiq is based on a methodology called Electroacupuncture According to Voll (EAV). EAV was researched by a team of medical doctors headed by Dr. Reinhard Voll. The knowledge about acupuncture points serves as a basis for the EAV measuring method. Today, experts around the world use EAV combined with different technology approaches to track the vitamin and mineral trend of their clients. With Vitastiq, we wanted to make this process simpler and widely accessible to everyone.

EAV methodology has been used for over 50 years around the world.

Traditional  
EAV device

Electrical circuit

Cable  
[connecting  
the pen to the sonde]

Sonde  
[hand electrode]

Vitastiq PRO device  
[BT connection  
to the tablet]

Tip of the pen  
[electrode on acupuncture point]
